

I would like to submit my comments on the NAB's petition 04-160 regarding the content of a service that I pay for. From time to time it seems that lobbyists and politics tend to stray into the world of business. I do not believe the content of a radio service that I am paying for should be overseen, limited or even thought about by these political groups. Competition is open in the market there is no need to give any particular sector or interest an unfair advantage. Let the market decide what they want and who they want to get it from. There are more important items to be debated and voted upon in today's world - free market is a great part of this country, competition is what drives us all from sports to business - there is no need to change the rules if everyone is playing by them.
